

Right Mouse Button Commands

Article Number: 1243 | Last Updated: Thu, Oct 20, 2011 3:34 PM

UltraEdit allows the right mouse button to display a pop-up menu. If the right mouse button is clicked while in a document window, the Edit menu is displayed at the position of the mouse click. If text is selected when the right mouse button is pressed, a new menu item Open File Highlighted is added to the top of the pop-up menu and if selected the file is opened if it exists.

If no text is selected, UltraEdit will examine the text under the cursor and if it finds what it believes may be a file it will add a new menu item "Open " followed by the name of the file it will try and open. If this is a URL the information will be passed to the default browser for opening.

If the right mouse button is clicked while in the UltraEdit main window and outside of a document window, the File menu is displayed at the position of the mouse click.
