

File Managers (Linux only)

Article Number: 5222 | Last Updated: Wed, Apr 25, 2012 4:11 PM

 **This help topic applies to UltraEdit on Linux only.**

File managers are used to view and manage files and folders.

There are two main types:

Graphical user interface (GUI) file managers (such as Nautilus, Dolphin, etc.) and command-line file managers (such as Midnight Commander, etc.).

GUI

GUI file managers are used to view and manage files and folders in a graphical user interface. They are typically used on desktop environments. Examples include Nautilus, Dolphin, and Thunar.
